Software Release Plan

Global Fish Tracking System

—

FOR	ESA and Starion
BY	Development Seed

VERSION	1.0
DATE	May 3, 2024

Introduction

This document describes the software release plan for the Global Fish Tracking Software (GFTS) DestinE Platform use case.

Release plan

In the GFTS project we are adopting an agile development and co-design approach. The release plan is therefore something that will evolve as we develop the system and get feedback from stakeholders throughout the process. At a high level the release plan is informed by the software requirements specification, for which we foresee to release according the following tentative schedule

Release ID	May	Jun	Jul	Aug	Sep	Oct	Nov
